Objective

To excel as a front-end developer by building innovative, user-focused solutions that merge cutting-edge technologies with exceptional design. Passionate about crafting seamless digital experiences, driving innovation, and contributing meaningfully to impactful projects that shape the future of the web.

Skill Highlights

Frontend (Experienced): React.js, Tailwind CSS, Bootstrap, JavaScript.

Backend (Familiar): Express.js, Node.js, MongoDB, Socket io.

Other Technologies: Firebase, Git, Github, JWT, Stripe.

Projects

Books Corner(Individual Project): Developed a dynamic marketplace for buying and selling books with robust admin management.

Features

- Enabled seamless cart, search, and filtering for buyers, ensuring an optimized user experience.
- Empowered sellers to list, update, and manage inventory effortlessly.
- Built admin controls to oversee user roles and platform activities, ensuring efficient moderation.

Technologies: React.js, Node.js, Express.js, MongoDB, Firebase, DaisyUI, React Table, Formik, Tailwind CSS.

Pets and Paws(Individual Project): Developed a platform for pet adoption, donations, and admin management.

Features

- Enabled users to add, adopt, and donate with real-time updates.
- Streamlined adoption by displaying only available pets.
- Built admin controls for managing users, pets, and campaigns efficiently.

Technologies: React.js, Node.js, Express.js, MongoDB, Firebase, Material Tailwind, Formik, Tailwind CSS, Stripe.
